TypeScript | Java | Flask

Experience

- **Front-End Developer/Web Content Manager, JANSON Communications** 2022-Present
 - Effectively managed and maintained the MarCorSysCom website for OPAC using AFPIMS, content management system, while enhancing UI features throughout the site to improve user engagement and satisfaction.
 - Oversaw all web-related projects and requests from Marine Corp Systems Command branches, successfully deploying new projects while ensuring timely completion of all requests.
- **Personal Portfolio Web Development Project** Nov 2022
 - Created a personal portfolio website from scratch utilizing HTML, CSS, JavaScript, and JQuery for people to learn about my background, skills, and field of interest.
 - This was carefully designed to give a modern, yet simplistic look with color schemes that are pleasant and satisfying to the user's eye. It also includes smooth and swift transitions and animations for optimal user interactions.
 - Took advantage of a public API to allow users to send me direct emails with name, contact information, and text for efficient and easy communication between me and potential recruiters or customers.
 - <https://schoi1102.github.io/SeungsooPortfolio/>
- **Scribe, Technical Support, Nurse Team Lead, Carient** 2021- 2022
 - Utilized the Epic software on a daily basis to input patient data ensuring accurate data entry which allowed our doctors to provide excellent patient care.
 - Programmed the software to automate specific tasks to maximize physicians' efficiency.
 - Web scrapped patient database within our software and used Excel to parse qualifying patients for new medical devices and procedures.
 - Resolved any issues that occurred within the offices, whether it was technological, technical, or office related.
- **Freelance Front-end Developer, Kingsman Shop** 2022
 - Consulted and created a full website, utilizing HTML, JavaScript, Express, EJS, RESTful, bootstrap, and CSS, for a local small business that met their needs and included their desired features, including their services, history, prices, and Gallery.
- **Game Developer, Fiverr** 2021-2022
 - Consulted clients discussing specific features and design of their product.
 - Programmed several python games using Pygame, according to client requests. I communicated with my clients throughout the process to ensure quality and satisfaction.
